

Vladimir Andronov

Senior Software Engineer

 40 years old  Finland  +358 45 1317037
 vladimir.andronov@gmail.com  andvla.com

I am a Senior Software Engineer with over 16 years of hands-on experience building robust, scalable software. My expertise spans across modern backend and full-stack architectures, allowing me to translate complex business needs into clean, functional code.

In recent years, I have focused heavily on building reliable integrations with external platforms like Meta, HubSpot, Stripe, various Auth systems and many more. To achieve high velocity without sacrificing quality, I rely heavily on advanced AI tools in my daily workflow. Combining my deep architectural expertise with the speed of AI allows me to multiply my output and solve complex architectural challenges much faster.

WORK EXPERIENCE

- Jobilla Oy - Senior Backend Engineer** 2016 - Present

Engineered robust internal core systems utilizing open-source infrastructure. I lead the design and implementation of numerous complex integrations with external systems, including comprehensive workflows with HubSpot, Stripe payment pipelines, and Meta APIs. By heavily integrating AI tools into my development cycle, I optimized code delivery and shifted focus toward high-level architectural solutions, significantly increasing team velocity.
- Progressive Web - Full-Stack Engineer (Self-Employed)** 2013 - 2016

After moving from Belgium to Finland, I launched an independent software venture. I gathered my own clients and contracted with agencies to build customer-facing platforms. This period allowed me to expand my expertise in custom JavaScript setups and structural CSS layouts, while also managing end-to-end client communications and technical project discovery.
- Webdoos - Full-Stack Engineer** 2012 - 2016

Progressed from an academic intern to a full-time engineer. Designed custom features for a proprietary Content Management System and authored specialized business engines to automate document management tasks for medical professionals in Belgium.
- Be-Housing - Developer** 2012

Managed technical operations as the sole internal developer overseeing a widespread apartment booking management network. I refactored critical workflow logic and managed the property tracking systems that kept core operations running.

SKILLS & TECHNOLOGIES

The list below represents an extensive collection of technologies and tools I have encountered throughout my career. Some of them I know in-depth, while others I have only explored on the surface. If you have questions about any specific skill, feel free to ask me in person.

Languages

Bash Scripting C# Go JavaScript PHP Python TypeScript

Backend & Frameworks

GraphQL gRPC REST APIs WebSockets

Frontend

Next.js React Tailwind CSS Vite Vue.js

DevOps & Infrastructure

AWS CI/CD Docker Git Gitlab Google Cloud Kubernetes Linux NGINX Terraform Vercel

Data & Messaging

Elasticsearch Kafka MongoDB MySQL PostgreSQL Redis SQLite Supabase

Integrations & Quality

Anthropic Claude API Datadog Grafana HubSpot API JWT Meta Graph API OAuth OpenAI API Resend Sentry Stripe Twilio

HOBBY PROJECTS

- FULL-STACK WEB ARCHITECTURE

Billingsimo - Billing system

Built a robust billing system to handle customer management, products, and services. It handles automated invoice generation and exports reporting data for standard accounting workflows. It remains in active practical use today.
- FULL-STACK WEB ARCHITECTURE

BuMaSy - Budget Management System

Designed an internal financial planner to replace loose spreadsheet logging. It allows users to track expenses, make budget predictions, and generate reports to accurately assess long-term affordability.

EDUCATION

●	Bachelor of Applied Science (BASc) in Informatics Howest, Brugges, Belgium	2008 - 2011
●	High School Degree in Applied Informatics Sint-Jozefsinstituut, Ostend, Belgium	2001 - 2008

LANGUAGES

- Dutch - Fluent
- English - Fluent
- Russian - Native
- French - Basic
